

Quotes and Testimonials

On Our Service

“Terri Ann does an excellent job building people’s confidence. This is important because among the things that our people are tired of [is] the tradition of poor services they received from their current provider. Knowing that they are being taken care of is almost as important as the tools themselves.”

Robert Johnson, Ph.D.,
Executive Director
LCTCSOnline

On Our Collaboration

“Because Moodle is an open source product, it was important to find an open and flexible learning management services provider that was willing to collaborate with the CSU. Moodlerooms services provide the scalability, integration experience and training program we need plus their willingness to work with the CSU system made them the logical choice to meet our Moodle needs.”

Kathy Fernandes,
Director of CSU LMS Initiatives CSU
Office of the Chancellor

On Our Value & Support

“Moodlerooms is worth every penny. We get so much value out of it and I get excellent support. I am very pleased with the level of support and the response I get – I give them an A plus.”

Marcia Kalayjian,
Media Specialist
Midland Valley High School

On Our Adaptability

“Our community wants a system that can be easily fine-tuned to meet the changing needs of the University. With Moodle we will be able to quickly utilize new tools and features and make them work in our environment.”

Robin Ethridge,
Director of Portal Technologies
and Academic Analytics, LSU

On Our Training

“I will recommend Moodlerooms’ training to all of my faculty trainers this summer here at Columbia. I have had a great experience with your team and you are all to be commended for developing such a thoughtful, extensive and enjoyable training process.”

David Noffs,
Columbia College Chicago

On Our Openness

“Many of our Turnitin customers are opting for the openness and flexibility offered by Moodlerooms’ learning management platform. Moodlerooms offers industry-leading standards of integration services to educational institutions who want to use Turnitin and Moodle together.”

Sally Elliott,
Chief Operating Officer
iParadigms

On Our Integrations

“Moodlerooms has done an extraordinary job integrating third-party tools. Overall, the integration of tools has saved Project KNOTT money by simplifying processes. The integration of Moodle with Google has saved countless hours of support with a single sign-on and has simplified the process of creating the user one time instead of two.”

Brad Henry,
Systems Architect and Engineer
Project KNOTT
