

Accelerate your Windows OS migration.

Dell | Windows® Migration Fast Forward Service

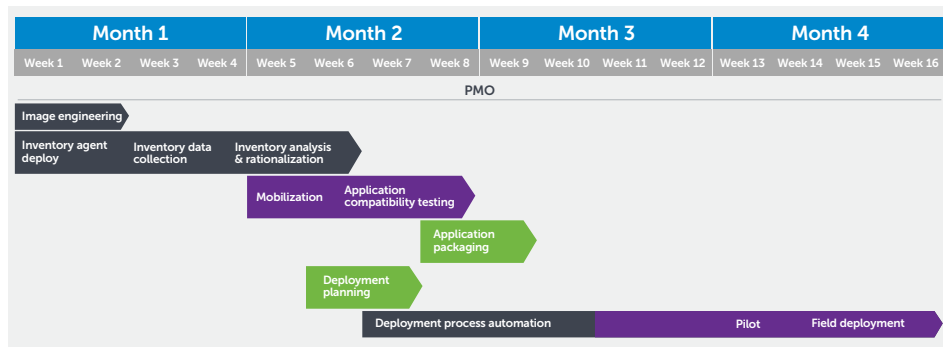

Dell can help ensure a smooth upgrade through a modular service that modernizes your XP devices.

Now is the time to move your clients to Windows 7 or Windows 8*

How will the end of Microsoft® XP support impact your organization? Dell experts can help you jump-start a new migration or fast-forward one already in progress. Partner with Dell OS migration services to avoid the complications that can lead to reduced productivity during the switch to Windows 7 or 8.

As the leading Microsoft Windows deployment partner, no one understands the challenges of system migration better than Dell. We deploy millions of enterprise-class Windows 7 and Windows 8 systems each year in over 150 countries. Let us help you make a smooth transition from XP before the upcoming April 2014 deadline.

Typical Dell | Windows® Migration Fast Forward Service time line

Key benefits:

- Migration of up to 5,000 PCs including:
 - Inventory
 - Application rationalization
 - Compatibility testing
 - Remediation
 - Packaging
 - Deployment
- Two Windows 7 or Windows 8 images (32-bit/64-bit)
- Automated task sequence for a lite touch installation (LTI) deployment
- Field technicians for installation and trash removal for up to five sites in a single metropolitan area
- Single point of contact, certified by the Project Management Institute (PMI) and experienced in PC deployment

What does our Windows Migration Fast Forward Service include?

For a limited time, Dell is offering a Windows Migration Fast Forward Service that will upgrade up to 5,000 of your client systems. Choose all of the available modules or select just the modules you need.

| Service | Description |
|--|--|
| Image engineering module | Our experienced image experts create 32-bit and 64-bit images that support up to 10 of your system models. We use your image requirements or Dell best practices based on our imaging experience worldwide. |
| Inventory and rationalization module | Utilizing our industry-leading tools, we inventory up to 5,000 PCs, clean and rationalize the inventory, then prepare your application library for testing. |
| Application compatibility testing module | Using our global applications factory, we rapidly test up to 100 of your critical applications for compatibility with your Windows 7 or Windows 8 image, fixing any issues we encounter. |
| Application packaging module | We package up to 100 of the applications used in the application compatibility testing module in preparation of deployment in your production environment. |
| Deployment planning module | We provide an experienced, PMI-certified program manager or solutions architect to help you build a comprehensive deployment plan. |
| Deployment process automation module | Using the Microsoft Deployment Toolkit 2012 Service Pack 1 and our patented deployment optimization methodologies, a deployment specialist builds and validates an automated deployment sequence for up to 10 system models. |
| Field deployment module | We work with you to execute your deployment plan for up to 5,000 systems. This includes coordinating hardware orders, managing deployment progress, removing all trash and disposing old PCs responsibly. |

Fast-forward up to
5,000 end users and up to five sites†
 to **Windows 7 or Windows 8**
 for a limited time at **special pricing.**

Microsoft has announced the end of support for Windows XP in April 2014

For more information about any of our service offerings, please visit Dell.com/services or contact your Dell representative.

* Microsoft SCCM 2012 Service Pack 1 is a requirement prior to any Windows 8 migration
