

# Available Features

Extend your learning management system with next-generation tools and features that provide unmatched functionality for your organization.

## Extend Learning

Organizations using Moodlerooms' joule platform can expand functionality and enhance the delivery of content by enabling additional features.

Moodlerooms can enable the specific plug-ins and add-ons that you choose for your program during our implementation process. If you do not see a feature that you would like to include in your joule configuration, we will work with you to add it through our customization process.

## Feature Formats:

### Module:

A module is software that allows for user interaction through various resources and activities.

### Block:

A block is software that provides users with access to information associated with a certain module.

### Authentication:

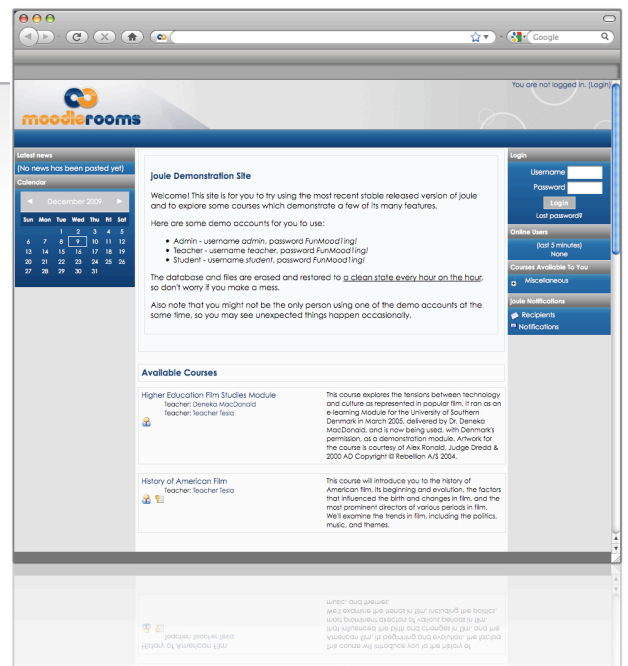

The authentication feature locates user names and checks for password validity before a user is logged in.

### Enrollments:

Enrollment is the process used to assign users to courses.

### Course formats:

Course formats allow authorized users to modify the layout and navigation of their courses.

# Moodle Core Features

Moodle has a continuously evolving set of features that are contributed by a community of developers, impacted by other instructors and freely available through the Moodle community.

## Benefits of Moodle Core Elements

- Usability
- Interoperability
- Security
- Performance

## Modules

### Assignment

Allows teachers to collect work from students, review it and provide helpful feedback.

### Chat

Allows participants to have real-time synchronous discussions on the Web.

### Choice

Can be useful as a quick poll to stimulate thinking about a topic.

### Database

Allows users to collaboratively build, display and search a bank of record entries.

### Exercise

An assignment tool that asks users to do a piece of practical work and provide a self-assessment before submission.

### Forum

A communication tool for users to submit content for all to read and discuss.

### Glossary

Allows participants to create and maintain a list of definitions, similar to a dictionary.

### Hotpot

Provides reports and statistical trends in quizzes administered by instructors.

### Label

A way to add text to the content area of your course.

### LAMS

*Learning Activity Management System* Is used for designing, managing and delivering online collaborative learning activities.

### Lesson

A series of interactive pages that require user interaction before advancing.

### Quiz

Allows instructors to design and implement quizzes consisting of a large variety of question types.

### Resource

A link within a course to a file or other material with additional information.

### SCORM

*Sharable Content Object Reference Model* is a collection of specifications that enable interoperability, accessibility and reusability of Web-based learning content.

### Survey

Provides standard, verified survey instruments that have proven useful in evaluating what users are doing and thinking in their courses.

### Wiki

A Web page that everyone in a course can create together without needing to know HTML.

### Workshop

A peer assessment activity with many options.

<b>Teaching</b>	<b>Communication</b>
Assignments	Forums
Lessons	Chat
Resources	Messaging
SCORM	Podcasts
<b>Collaboration</b>	<b>Assessment</b>
Groups	Quizzes
Glossary	Question Bank
Wikis	Grades
Blogs	Surveys

# Moodle Core Features continued

## Blocks

### Activities

Enables navigation between different activities available in a course (Forums, Quizzes, Assignments, Lesson module).

### Administration

Links to administration tasks, such as Notifications, Users, Courses, Modules and Appearance.

### Admin Bookmarks

Administrators can save frequently visited areas of the admin panel by bookmarking the page in this block.

### Blog Menu

Provides links to add a new entry, view entries, blog preferences, view site entries and add/delete tags.

### Blog Tags

A term associated with a blog entry that describes it and enables keyword-based classification of information for the purpose of retrieval.

### Calendar Month

Displays site, course and group events in calendar format.

### Calendar Upcoming

A calendar that displays a user's upcoming events.

### Course List

Lists and enables navigation between all of the courses in which the logged in user is enrolled.

### Glossary Random

Displays random entries from a glossary, which usually take the form of dictionary-style definitions.

### HTML

A standard block used to add text or images to a site or course page using HTML.

### Login

Allows a user to login with credentials from the front page of the site, rather than from a separate login page.

### Mentees

Provides a user's mentor with quick access to user's profile page.

### Messages

Displays a list of new messages received, with a link to the messages window.

### MNET Hosts

Lists other Moodle or Mahara sites that are connected together with "Moodle" Net connection.

### News Items

An updated list of the latest news items.

### Online Users

Shows a list of users who are currently logged into a course.

### Participants

A list of the instructors and users who make up a course.

### Quiz Results

Displays the highest and/or lowest grades achieved on a quiz within a course.

### Recent Activity

Lists recent course activity since the user last accessed the course.

### RSS Client

Web feed formats used to publish and keep users informed of frequently updated work.

### Search

Allows users to search all activity modules.

### Search Forums

Allows users to search course forums for a particular word or phrase.

### Section Links

Helps the user quickly navigate to a particular topic/week section.

### Site Main Menu

Allows the site administrator to add resources and activities to the main page of the site.

### Social Activities

Lists and allows navigation between the different activities available in a course.

### Tags

Allows users to describe their interests in a way that is easy for people with similar interests to find them.

### Tags flickr™

Displays flickr™ photos with the same tag words that are related to the tags on a page.

### Tags YouTube™

Displays YouTube™ videos with the same tag words that are related to the tags on a page.

## Moodlerooms Tested Features

Do more with your learning management system by enabling an advanced set of tools and features that are fully tested by Moodlerooms and made available exclusively through joule.

Take advantage of enhancements that have been developed and fully maintained by Moodlerooms' team. These developments are available through either the open-source community, the Moodlerooms community, or joule.

Available third-party plug-ins and add-ons allow for additional features to thrive in Moodlerooms' secure, reliable and scalable environment. Third-party support is provided by the Moodlerooms community and proprietary companies.

Our close partnerships allow for additional opportunities to enhance your site. Moodlerooms fully supports and regularly updates these integrations to ensure stability and compatibility with future version releases.

There are many additional benefits available to joule customers that provide them with the options they need to successfully boost their learning programs.

## Moodlerooms Developed

We take great care to listen to the needs of our customers and have developed many features to meet those needs. We continue to come up with new tools and features to ensure the sustainability of your online learning program.

## Third-Party

Take advantage of the powerful features available through third-party sources. Support is provided by the third party and may require a subscription.

## mPower Partners

Strategic partnerships have been, and will continue to be, an enormous value in operating Moodlerooms. These partnerships make providing secure, reliable and scalable learning management solutions possible.

## Moodlerooms Tested Features

### Moodlerooms Developed

To ensure the sustainability of your online learning program, Moodlerooms continues to develop new tools and features to meet your voiced needs. joule users have access to any of our available features and fully supported developments.

#### Moodlerooms Developed

*Developed, tested and supported by Moodlerooms to meet the needs of our customers.*

Modules	Blocks		
<p><b>Course Resource System</b> A supported range of resource types which instructors can add to their course sections.</p>	<p><b>Conduit</b> An advanced mapping tool for user authentication, course enrollment, and grades between the site and an SIS or ERP.</p> <p><b>Course Categories</b> Displays a list of course types, and reveals all of the courses within that category.</p> <p><b>Course Convert</b> Uploads course archive files to a staging area, converts them into joule archives, and then restores them to the site.</p> <p><b>Course Management</b> Allows site administrators to schedule backup and restores of courses at non-peak usage times and allows site administrators to delete multiple courses at one time from one user interface.</p> <p><b>Data Collectors</b> Extracts data from the site into optimized tables for the purpose of efficient reporting.</p>	<p><b>Google</b> Users are able to access Google Apps services from within joule (Google Docs, Google Calendar, and Gmail).</p> <p><b>Gradebook Enrollment</b> Provides conditional enrollment into certain courses based on performance in other courses.</p> <p><b>Invite</b> Allows instructors to invite a registered or non-registered user to access a course.</p> <p><b>mPower</b> Allows administrators to easily edit themes without requiring CSS.</p> <p><b>My Courses</b> Allows one-click access to a course's home page.</p> <p><b>My Links</b> A collection of a user's most frequently visited links.</p> <p><b>Notifications</b> Instructors can create notification alerts based on student interactions (or lack there of) within course activities.</p>	<p><b>Profile Redirect</b> Provides a way to send specific groups of learners directly into a specific course on login, bypassing the front page.</p> <p><b>Question Tags</b> Adds the ability to tag questions with areas of knowledge for detailed reporting on the learner's quiz attempts.</p> <p><b>Reports</b> Instructors can monitor student progress using these powerful reports, which indicate what participants are doing when and for how long.</p> <p><b>Template</b> Institutions create customized alert letters that are available to the notification system.</p> <p><b>Trouble Ticket</b> Allows users to notify site administrators of a problem with the site or a specific module or block, and allows instructors to add multiple types of trouble tickets to a page as either a link or a button.</p> <p><b>Tybit Internet Search</b> A specialized search engine that can be configured within the course.</p>

## Moodlerooms Tested Features

### Third Party

Take advantage of these powerful features available from our third party partners. Third-party support is provided separately by either the Moodlerooms community or proprietary companies. Some of these features may require subscriptions or licensing fees.

#### Open Source

*Third-party features that have been developed and made available through the open-source community.*

#### Modules

##### Assessment

A survey module that allows mapping to outcomes.

##### Attendance

Allows instructors to keep track of who is attending their course.

##### Book

Can be used to build complete book-like Web sites inside of a course.

##### Certificate

Creates PDF certificates/ diplomas for students upon completion of a course.

##### Face-to-Face

Used to keep track of in-person sessions that require advance booking.

##### Feedback

Allows the creation of surveys to collect feedback from users.

##### Flashcard Module

A memory training device that uses the concept of repetition and presents the user with relationships to be memorized.

##### Game Module

Eight interactive games to make learning fun: Hangman, Crosswords, Cryptex, Millionaire, Sudoku, The Hidden Picture, Snakes and Ladders, and Book with Questions.

##### Lightbox Gallery

Apply various effects to image galleries created within a course.

##### Map (Google Maps)

Allows the creation of geographic maps to be used within courses. Can be used for student locations and other course content.

##### Mindmap

Used to organize and structure items arranged around a central key idea in order to help organization and idea generation in a course.

##### Podcast

An easy way to incorporate a series of audio files to be made available within a course.

##### Questionnaire

Allows users to complete online feedback style forms and create their own questionnaires using a variety of user input methods.

##### Sloodle

An integration with Second Life's virtual world. A course activity links the student into a virtual room where course activities can be represented visually with 3D.

#### Blocks

##### Activity Locking

Places conditional locks on all of the sequential activities in a course. Results of one activity can affect the visibility of another activity.

##### Add User

Allows an instructor to add users to the list of registered users as well as to the site.

##### Ajax Marking

Allows instructors to view and complete all grading and marking without leaving the page they are on.

##### Announcement

Displays a general announcement within a course.

##### Attendance

Students view their attendance records with this block while instructors take attendance, report on attendance or change attendance settings.

##### Class List

A quick list view of all of the course members.

##### Course Complete

Provides a way to create elements within a course that signals its completion.

# Moodlerooms Tested Features

## Third Party continued

### Open Source continued

Third-party features that have been developed and made available through the open-source community.

#### Blocks

##### eMail List

Provides a list of all users' e-mail addresses within a course.

##### Exabis ePortfolio

Enables portfolio work for students across courses building up and using their individual category-system.

##### Face-to-Face

Quick access to keep track of in-person trainings.

##### Form Maker

Allows an administrator without technical skills to create an HTML form and control its submissions.

##### Participant Pix

Displays icons of course or group members.

##### QuickMail

A mail composition text area that allows instructors to select a specific subset of students to send a message to.

##### Sloodle Menu

Provides an easy way to view Second Life actions and events from within the course.

##### Task List

Allows users to create a check list of tasks they have yet to accomplish.

#### Authentication

##### Auth Upload File

## Moodlerooms Tested Features

### mPower Partners

Moodlerooms' mPower Program allows joule clients to extend functionality with a vast array of tools and services provided by a growing list of participating partners. All mPower plug-ins are thoroughly tested to ensure stability and reliability. We also fully support and maintain all integrations for a seamless fit within joule.

#### **EQUELLA**

*The Learning Edge Group*

Included as part of joule, EQUELLA is an award-winning digital repository that allows instructors to "discover" the highest quality learning objects available to them using rating, tagging and federated search functionalities. They can also classify and search for learning objects by standards, ensuring alignment to outcomes and assessments.

#### **eFolioWorld**

An included feature of joule, eFolio allows individual users to create their own personal Web site that serves as a living showcase of their education, work and personal achievements.

#### **iParadigms**

*Turnitin*

Clients with Turnitin subscriptions have the capability to manage assignments using Turnitin, the world's leading plagiarism prevention service, directly within a course in joule. Turnitin helps ensure students are aware of and held to the highest standards regarding proper research and citation.

#### **Grademark**

Clients with GradeMark subscriptions have the capability to manage assignments using GradeMark, a digital mark-up and grading tool, directly within a course in joule. GradeMark provides a rich set of tools for clear mark-ups, custom feedback and standardized rubrics.

#### **Dell**

Moodlerooms partners with Dell to provide reliable on-site hosting options.

#### **AMVONET**

This integration gives users access to AMVONET Connect™ Lite, a synchronous presentation tool. Using AMVONET, users can review and discuss course materials in real time via chat, and share content and ideas using AMVONET's interactive white board. Organizations can upgrade to a paid subscription to allow students to interact via Web-based video and to record classes for later playback.

#### **Datatel**

Moodlerooms and Datatel have established an exclusive partnership to integrate learning management functionality with enterprise resource planning. This partnership combines joule with Datatel's Colleague ERP system to give institutions a more complete view of their students.

#### **WebEx**

*Cisco*

Moodlerooms, in collaboration with Cisco, has developed an exclusive integration that enables users to create, facilitate, record and track WebEx sessions entirely within joule. The Cisco WebEx Training Center subscription allows for meetings or class sessions to be facilitated not only by voice through phone conferencing, but also face-to-face through video conferencing, displaying up to six Web cams at one time.
